### 2. Data Collection

We respect your privacy and do not collect any personally identifiable information without your explicit consent. However, we do collect certain basic information about your visit for statistical purposes using a tool called AWStats, hosted on a Dutch server. The information collected includes:

- **User Agent:** This is a technical identifier that helps us understand what type of browser and device you are using.
- **Browser Version:** We collect the version of the browser you are using to ensure a better user experience.
- **Country Code:** We gather the country code of your location for general geographical analysis.
- **IP Address:** AWStats uses server log files to gather information, including your IP address. However, this IP address is not connected to any personal information like names or email addresses.

### 3. Purpose of Data Collection

The information collected through AWStats is used for statistical analysis of user behavior and to improve the functionality and content of our Website. This data helps us understand which parts of our Website are popular, how users navigate through the site, and what technologies they are using.

### 4. Data Security

We take data security seriously. All email traffic and website data are hosted on servers in the Netherlands, and we enforce SSL encryption for all connections. This encryption ensures that the data exchanged between your browser and our servers remains confidential.

### 5. WordPress Platform and Jetpack Site Analysis

Our Website is built on the WordPress platform and utilizes Jetpack site analysis for insights into visitor interactions. Jetpack may collect certain technical data, such as your IP address and information about your device and browser, to provide us with aggregated and anonymized statistics about our Website's usage. These statistics help us enhance the user experience and content.

## **6. AWStats and Data Collection**

AWStats does not use HTTP cookies or JavaScript code from visitors' browsers. The data collected from server log files cannot be assigned to specific individuals, and this data will not be combined with other data sources. The AWStats program is installed on our own hosting package and does not transmit data to foreign servers.
